

Neighborhood Meeting

Landscape Design with Highland Hospital

Thursday October 22

5:30-7:30

**Olmstead Lodge (in Highland
Park on Reservoir ave)**

The Highland Hospital Campus sits inside our beautiful residential neighborhood and is the backdrop to many historic homes in our area. It is adjacent to the pathway our children take on their way to school #12 as well as a major neighborhood gateway to Highland Park. The Hospital look and feel creates a lasting impression on neighbors, visitors to Highland Hospital, Lilac Festival goers and people looking to purchase homes in the neighborhood.

Recognizing that Highland plays this integral role in shaping our neighborhood, a committee of hospital administrators, landscape architects and committed neighbors is working to develop a Landscaping Master Plan to govern the landscape design around the Hospital to better integrate the campus into our neighborhood and Highland Park. Highland has hired Landscape Architect Kim Michaels from the firm of Trowbridge Wolf Michaels (who developed plans for the Highland Park restoration in the 1990's) to develop a landscape plan for the Highland campus.

We will meet informally to see and comment on proposals and add our own ideas.

This is an opportunity to influence how this area of our neighborhood will look in the future.

Please come and join us!
